Broome’s Roebuck Bay contains a sunken armada of historic flying boats from World War II, which is a unique archaeological resource. No other place in the world has such a collection of rare and historically significant flying boats, all of which were sunk in a matter of minutes of each other, creating a snap shot of a tragedy in Australia’s aviation history. This guide provides information on six of the wreck sites that are exposed during astronomical spring low tides. In total, 15 flying boats were destroyed during an air raid by nine Mitsubishi A6M2 ‘Zero’ fighters of the 3rd Kokutai (Aircraft Group), Imperial Japanese Navy, on 3 March 1942.

A Dornier wreck in Broome, the X–23. WA Museum.

CASUALTIES PER FLYING BOAT

NOTES ON WALKING TO THE LOW TIDE WRECK SITES AND VISITOR PROTOCOLS:
Leave Town Beach an hour before low tide – approximately 30 minute walk to reach the wrecks. Wrecks visible when tide depth is at least 0.4 metres above chart datum (a minus reading is better). The Broome flying boat wrecks are protected under the ‘Heritage of Western Australia Act 1990’. Please do not disturb the wrecks, do not remove artefacts and do not walk on exposed structures.
Breakdown of the aerial armada lost in Roebuck Bay:
Five Dornier Do 24Ks and four PBY-5 Catalinas of the Marinelandvaartdienst (Royal Netherlands Naval Air Service – MLD). Some of these were filled with refugees fleeing the Japanese invasion of Java in the Netherlands East Indies (now Indonesia).

Two PBY–5 Catalinas of the Royal Air Force (from Singapore).

Two PBY–4 Catalinas of the United States Navy Patrol Wing 10, which had retreated from the Philippines.

Two four engine Short Empire flying boats, one being operated by the Royal Australian Air Force, the other by B.O.A.C.

Only four of these aircraft have been identified in Roebuck Bay: The MLD’s Dornier X–1, X–23, Catalina Y–59 and the RAF’s Catalina FV-N, which are all exposed at low tide. Another nine flying boat wreck sites occur in the deep-water channel, south of the exposed wreck sites, but these are all yet to be located and identified.

Approximately 80 people (including women and children) were killed during the air raid. Not all of their names were recorded.
