60

59

58

57

56

55 Red-tailed Black Cockatoo young loses spots and stripes to become an adult.

54

53

52 Bushfire has destroyed a nesting tree - find another nest hollow.

51

41

42

43 Carnaby's Cockatoo returns to nest box in Wheatbelt for Spring breeding.

44

45

46

47

48

49 Feral bees have taken over nest hollow - killed the young chicks.

50

40

39

38 Hatching chick takes first flight after 80/90 days in nest.

37

36

35 Baudin's Cockatoo finds food in a native garden planted by students in their school.

34

START

FINISH

How to get started

- 1 Colour your game to make it look attractive.
- 2 Cut out the tors (cockatoo heads).
- 3 Enjoy playing Cockatoo Care Capers with your family and friends.

How to play

- 1 This is a game for two or more people.
- 2 You will need a die.
- 3 Everybody starts on square one.
- 4 Take turns to roll the die.
- 5 Move forward the number of squares as indicated on the die.
- 6 If you land on the base of an old tree trunk, climb up to the top.
- 7 If you land on a cockatoo head, slide down the bird to its tail.
- 8 The first person to reach the end is the winner.

Congratulations!

You have learnt a lot about how to care for our cockatoos.

Red-tailed Black Cockatoo
Grows to a length of 53-55cm. Lives in eucalypt forests and acacia scrubs of South West of Western Australia. Also two other species, one in the western arid zone and the other in the Kimberley.

Carnaby's Cockatoo
Grows to a length of 53-58cm. Lives in scrubs and heaths, and adjacent eucalypt forests of South West of Western Australia.

Baudin's Cockatoo
Grows to a length of 50-60cm. Lives in eucalypt forests of the South West of Western Australia. Has a longer beak than the Red-tailed Black Cockatoo or the Carnaby's Cockatoo.
