

Bite mark identification

Carnaby's Cockatoo

Zanda latirostris

Male (left), Female (right)

Carnaby's Cockatoo with its short upper bill uses a less-elegant approach (than Baudin's Cockatoo) to extract the seeds from Marri nuts.

White-tailed cockatoos eat seeds of, and enjoy the nectar of, flowers including:

Dryandra (Banksia) nivea

Dryandra (Banksia) sessilis

Hakea undulata
