

# Checklist of the Birds of Christmas Island and Cocos (Keeling) Islands

*Falco cenchroides* feathers (Christmas Island)

**R.E. Johnstone and J.C. Darnell**

Collections and Research, Western Australian Museum, Kew Street, Welshpool, WA 6106

April 2022 (No changes since October 2021 issue)

---

This checklist covers Christmas and Cocos (Keeling) Islands in the tropical eastern Indian Ocean and their surrounding seas. Christmas Island lies 290 km south of Java (Indonesia) and 1,400 km north-west of Western Australia. It is a small uplifted volcanic island (137 km<sup>2</sup> in area) and is administered by Western Australia as an External Territory of Australia. The Cocos (Keeling) Islands lie 970 km west of Christmas Island and 2,100 km north-west of Western Australia. They comprise two low-lying atolls, a large southern atoll (Cocos) consisting of about 26 islands around a horseshoe-shaped lagoon and a smaller North Keeling Island lying 25 km to the north. They cover a land area of about 14 km<sup>2</sup> and are also administered by Western Australia as an External Territory of Australia.

The main aim of this work is to provide an up-to-date checklist of the birds of this region to include the large number of additional species that have been recorded on these islands since the publication of the Annotated Checklists of Christmas Island and Cocos (Keeling) Islands in 2004 (Johnstone and Darnell Appendix A and B in: *Handbook of Western Australian Birds* Volume II) and the more recent review of the birds of Christmas Island (James and McAllan 2014 *Australian Field Ornithology* Suppl. 31).

Criterion for inclusion of a species or subspecies on the list is, in most cases, supported by tangible evidence i.e. a museum specimen, an archived or published photograph or detailed description or video recording.

The advent of molecular investigation into avian taxonomy has required, and still requires, extensive and ongoing revision at all levels – Family, generic and specific. This “Checklist of the Birds of Christmas and Cocos (Keeling) Islands” is a collation of the most recent information/research emanating from such studies, together with the inclusion of newly recorded species.

Due to the publication of research at differing intervals and the fact that these authors may hold varying opinions, delays of incorporating this new data into checklists will also vary. Where considered appropriate, these latest research findings have been included as has some pre-published material in order to make this checklist as up to date as possible.

From these comments it can be seen that avian taxonomy is a “work in progress” and that it is currently some way from having a definitive world list although the International Ornithologists’ Union has formed a working group on avian checklists based on the current International Ornithological Committee (IOC) checklist. Overall, departures from the prime reference material in both global and regional lists (as above) have been minimised. Subject to the general consensus/opinion of other authors, the IOC comments have been accepted relating to the higher taxonomic levels and taxonomic status beyond Australia, but not where the Western Australian Museum collection material, distributional data base etc. shows otherwise.

Changes should only come when there is certainty and consensus and the Western Australian Museum’s objective is to maintain the status quo until claimed revisions have been thoroughly analysed and accepted.

Amendments to the previous checklists have been carried out with reference to both global and regional publications/checklists. The prime reference material for global coverage has been the International Ornithological Committee (IOC) World Bird List, *The Clements Checklist of Birds of the World*, the *Illustrated Checklist of the Birds of the World* Volumes 1 and 2 (Lynx Edicions, Barcelona), *A Checklist of the Birds of Britain*, 8<sup>th</sup> edition, the *Checklist of North American Birds* and, for regional coverage, *Zoological Catalogue of Australia* volume 37.2 (Columbidae to Coraciidae), *The Directory of Australian Birds*, Passerines, the Working List of Australian Birds (Birdlife Australia) and the Checklist of the Birds of Western Australia (Western Australian Museum).

Increased public interest in ornithology combined with improved identification knowledge, the increasing number of “bird watchers” having high-technology photographic equipment, and more extensive field excursions (to these remote islands) all have contributed here. Whether all of these newly recorded species are

in fact migratory “strays” which have been missed earlier, or whether other factors such as habitat destruction (along migratory routes) or climatic change is involved is of course unknown.

In the table below, the ecological status for each species is given i.e. whether a resident or a breeding or non-breeding visitor, endemic, introduced, whether the species is migratory, or a passage migrant (i.e. Palaearctic species that breed in Northern Hemisphere and migrate annually to winter in Southern Hemisphere, especially Australia), or vagrant. For some vagrants and rare visitors, records are individually cited. A comment is also given for each species on its relative abundance i.e. is it very common, common, moderately common, uncommon, scarce or rare. The status of some species has changed dramatically in the past decade. For example, the White-breasted Waterhen was first recorded on Christmas Island in 1993, bred successfully, but the population then declined and is now an uncommon resident. It was first recorded on Cocos (Keeling) Islands in 2004 (probably from Christmas Island) and is now a common resident with a population of ca. 2,000. Abbreviations for the Abundance/Status comments are outlined in the table below. The aim of this checklist is to summarise all available data on systematics and taxonomy, provide brief explanations for changes, incorporate new higher-level classifications and recent new generic, specific and subspecific changes. Where necessary, reasons for departing from the current above-named checklists (IOC, Birds Australia etc.) are also given. Where there is doubt on the identification of a subspecies it is included in [ ] square brackets. A brief footnote is also given on the taxonomic status of many species and subspecies recorded from these islands based on specimens or photographs, but in many cases the subspecific identity of many visitors is unknown.

As expected, most migrants are of eastern Asian origin, but there has proven to be an element of records of species e.g. European Roller and Tree Pipit which are unknown from South-East Asia.

Over the past decade the regular bird reports of both resident and visiting naturalists to these islands have added a great deal to our knowledge of the avifauna. Special mention should be made of the trip reports of Richard Baxter and Mike Carter and the reports from Cocos (Keeling) by Geof Christie and Pam Jones.

We thank Kenny Travouillon for checking taxonomic literature and especially Kim Sarti for his development, layout and updating of this checklist document.

<sup>14</sup> <i>Apus apus</i> (Linnaeus, 1758).....	Common Swift	V	Ø

<sup>1</sup> Subspecies unknown, most likely the nominate.

<sup>2</sup> Previously placed in the genus *Anas*.

<sup>3</sup> Breeding population now well established; up to 70 birds recorded.

<sup>4</sup> Two birds recorded 2016-17.

<sup>5</sup> Domestic strain introduced to Cocos (Keeling) Is., but now extirpated.

<sup>6</sup> Domestic strains on both islands. On Christmas I., wild populations show characteristics of ancestral Red Junglefowl stock.

<sup>7</sup> Subspecies unknown, most likely the nominate.

<sup>8</sup> Subspecies not determined.

<sup>9</sup> Sometimes treated as a subspecies of *C. esculenta*.

<sup>10</sup> Regular reports of *Aerodramus* spp. from both Christmas I. and Cocos (Keeling) Is., but no specimens available. Field identification for this group is problematic and possibly includes Himalayan Swiftlet, Mossy-nest Swiftlet, Black-nest Swiftlet and Edible-nest Swiftlet with the probable occurrence of at least two of these species.

<sup>11</sup> Subspecies unknown, most likely the nominate.

<sup>12</sup> Identified from photographs - 1 February 2018.

<sup>13</sup> Unconfirmed sightings of *Hirundapus* spp. could be attributed to either Silver-backed Needletail *H. cochinchinensis* or Brown-backed Needletail *H. giganteus*.

<sup>14</sup> Most likely ssp. *pekinensis*.

<sup>15</sup> <i>Apus pacificus</i> (Latham, 1801).....Pacific Swift (Fork-tailed Swift)		
<sup>16</sup> <i>Apus pacificus pacificus</i> (Latham, 1801).....	Vr	V
<sup>17</sup> <i>Apus nipalensis</i> Hodgson, 1837.....House Swift	V	V

### Order COLUMBIFORMES

#### Family COLUMBIDAE Pigeons and doves

<sup>24</sup> <i>Columba livia</i> Gmelin, JF, 1789.....Domestic Pigeon (Rock Dove)	V	V
<i>Streptopelia orientalis</i> (Latham, 1790).....Oriental Turtle Dove		
<i>Streptopelia orientalis meena</i> (Sykes, 1832).....	Ø	V
<sup>25</sup> <i>Streptopelia [decaocto]</i> (Fridvaldszky, 1838).....Eurasian Collared Dove	V	Ø
<i>Streptopelia tranquebarica</i> (Hermann, 1804).....Red Collared Dove		
<i>Streptopelia tranquebarica humilis</i> (Temminck, 1824).....	V	V
<i>Chalcophaps indica</i> (Linnaeus, 1758).....Emerald Dove		
<sup>26</sup> <i>Chalcophaps indica natalis</i> Lister, 1888.....	ERc	X
<sup>27</sup> [ <i>Caloenas</i> ] [ <i>nicobarica</i> ] (Linnaeus, 1758).....Nicobar Pigeon	V	Ø
<sup>28</sup> <i>Ducula rosacea</i> (Temminck, 1836).....Pink-headed Imperial Pigeon	Ø	X
<sup>29</sup> <i>Ducula whartoni</i> (Sharpe, 1887).....Christmas Island Imperial Pigeon	ERc	X
<i>Ducula bicolor</i> (Scopoli, 1786).....Pied Imperial Pigeon	V	Ø

<sup>15</sup> *A. pacificus* has recently been split into a number of taxa.

<sup>16</sup> Some observations could be attributed to related taxa.

<sup>17</sup> Currently expanding its range in Lesser Sundas, Indonesia (Johnstone *et al.* 2014). Sometimes treated as conspecific with the Little Swift *Apus affinis*. Subspecies not determined.

<sup>18</sup> Identified from photographs – December 2018.

<sup>19</sup> Subspecies not determined, most likely *chinensis*, but *malayanus* may occur. (James and McAllan 2014, *Aust Field Ornith. Supp.* **31**: 116–117).

<sup>20</sup> Formerly in genus *Cacomantis*.

<sup>21</sup> Unconfirmed report for Christmas I. 2001; one positive record for Cocos (Keeling) Islands 2016.

<sup>22</sup> Subspecies unknown, most likely the nominate.

<sup>23</sup> The Himalayan Cuckoo *C. s. saturatus* and Horsfield's Cuckoo *C. s. optatus* are herein combined within the vernacular Oriental Cuckoo; both ssp. are likely to occur. Contra to the discussion by James and McAllan 2014, *Aust Field Ornith. Supp.* **31**: 117–118, the only two specimens measured from Cocos are referable to *C. s. optatus*.

<sup>24</sup> All records attributed to domesticated strains.

<sup>25</sup> Unconfirmed sighting 1993; probably ship assisted.

<sup>26</sup> Introduced to Cocos (Keeling) Islands 1890–1895, but now extirpated.

<sup>27</sup> Possible sighting listed by Chasen 1933.

<sup>28</sup> Introduced to Cocos (Keeling) Islands ca. 1890, but now extirpated.

<sup>29</sup> Introduced to Cocos (Keeling) Islands ca. 1890, last known record in 1906.

### Order GRUIFORMES

#### Family RALLIDAE Rails, crakes, waterhens and coots

<i>Crex crex</i> (Linnaeus, 1758).....	Corncrake (Corn Crake)	V	V
<sup>30</sup> <i>Lewinia striata</i> (Linnaeus, 1766).....	Slaty-breasted Rail	Ø	V

<sup>33</sup> <i>Tribonyx ventralis</i> (Gould, 1837).....	Black-tailed Nativehen	V	Ø
<sup>34</sup> <i>Paragallinula angulata</i> (Sundevall, 1850) .....	Lesser Moorhen	Ø	V
<i>Gallinula chloropus</i> (Linnaeus, 1758).....	Common Moorhen		
<sup>35</sup> <i>Gallinula chloropus chloropus</i> (Linnaeus, 1758).....		Ø	V
<sup>36</sup> <i>Fulica atra</i> Linnaeus, 1758.....	Eurasian Coot	V	Ø
<sup>37</sup> <i>Zapornia fusca</i> (Linnaeus, 1766).....	Ruddy-breasted Crake	V	V
<sup>38</sup> <i>Zapornia pusilla</i> (Pallas, 1776).....	Baillon's Crake		
<sup>39</sup> <i>Zapornia pusilla pusilla</i> (Pallas, 1776) .....		V	V
<i>Gallicrex cinerea</i> (Gmelin, JF, 1789).....	Watercock	V	Vu
<i>Amaurornis phoenicurus</i> (Pennant, 1769).....	White-breasted Waterhen		
<sup>40</sup> <i>Amaurornis phoenicurus phoenicurus</i> (Pennant, 1769).....		Ru	Rc

### Order PHOENICOPTERIFORMES

#### Family PHOENICOPTERIDAE Flamingos

<i>Phoenicopterus roseus</i> Pallas, 1811 .....	Greater Flamingo	Ø	V
---	------------------	---	---

### Order CHARADRIIFORMES

#### Family HAEMATOPODIDAE Oystercatchers

<i>Haematopus fuliginosus</i> Gould, 1845.....	Sooty Oystercatcher		
<i>Haematopus fuliginosus ophthalmicus</i> Castelnau & Ramsay, 1877 .....		V	Ø

#### Family RECURVIROSTRIDAE Stilts and avocets

<i>Himantopus himantopus</i> (Linnaeus, 1758) .....	Black-winged Stilt		
<sup>41</sup> <i>Himantopus himantopus leucocephalus</i> Gould, 1837.....	Pied Stilt (White-headed Stilt)	V	V

#### Family CHARADRIIDAE Plovers, dotterels and lapwings

<i>Vanellus cinereus</i> (Blyth, 1842) .....	Grey-headed Lapwing	Ø	V
<i>Vanellus miles</i> (Boddaert, 1783) .....	Masked Lapwing	V	V
<i>Pluvialis fulva</i> (Gmelin, JF, 1789) .....	Pacific Golden Plover	Vis	Vis
<i>Pluvialis squatarola</i> (Linnaeus, 1758) .....	Grey Plover (Black-bellied Plover)		
<sup>42</sup> <i>Pluvialis squatarola squatarola</i> (Linnaeus, 1758).....		V	Vu

<sup>30</sup> Subspecies unknown. Sometimes placed in the genus *Gallirallus*.

<sup>31</sup> Formerly placed in the genus *Gallirallus*.

<sup>32</sup> Thirty nine birds translocated from Pulu Keeling to Horsburgh I. in April 2013.

<sup>33</sup> Sometimes placed in the genus *Gallinula*.

<sup>34</sup> Formerly placed in the genus *Gallinula*.

<sup>35</sup> No specimens available, but photographs suggest the nominate ssp.

<sup>36</sup> Subspecies unknown.

<sup>37</sup> Formerly placed in the genus *Porzana*. Subspecies unknown, most likely the nominate ssp.

<sup>38</sup> Sometimes placed in the genus *Porzana*.

<sup>39</sup> No specimens available, but photographs suggest the nominate ssp.

<sup>40</sup> First recorded on Christmas I. in 1993; bred successfully to become Common, but subsequently numbers dwindled to now Uncommon resident. First recorded on Cocos I. in 2004, now a Common resident. Estimated population ca. 2,000 birds.

<sup>41</sup> Sometimes treated as a full species *H. leucocephalus*. However, the evidence for treating the Black-winged Stilt complex as anything but a single species is hard to justify.

<sup>42</sup> Some observations may be attributed to *P. s. tomkovichii*.

<sup>43</sup> <i>Charadrius dubius</i> Scopoli, 1786.....	Little Ringed Plover	V	V
<sup>44</sup> <i>Charadrius alexandrinus</i> Linnaeus, 1758 .....	Kentish Plover	V	Ø
<i>Charadrius ruficapillus</i> Temminck, 1821 .....	Red-capped Plover (Red-capped Dotterel)	V	V
<sup>45</sup> <i>Charadrius mongolus</i> Pallas, 1776 .....	Lesser Sand Plover.	V	Vu
<sup>46</sup> <i>Charadrius leschenaultii</i> Lesson, 1826 .....	Greater Sand Plover	V	Vis
<i>Charadrius veredus</i> Gould, 1848 .....	Oriental Plover	Vi	Vi
<i>Elsyornis melanops</i> (Vieillot, 1818).....	Black-fronted Dotterel	V	Ø

<sup>43</sup> Most likely ssp. *curonicus*.

<sup>44</sup> Subspecies not determined.

<sup>45</sup> Subspecies not determined

<sup>46</sup> Subspecies unknown, most likely the nominate.

<sup>47</sup> Subspecies not determined, most likely ssp. *variegatus*.

<sup>48</sup> The name Far Eastern Curlew is preferred to reduce confusion with the eastern race of the Eurasian Curlew *N. arquata orientalis*.

<sup>49</sup> Most likely ssp. *orientalis*.

<sup>50</sup> Subspecies *lapponica* and *bauerii* are likely to occur.

<sup>51</sup> Subspecies not determined, most likely ssp. *melanuroides*.

<sup>52</sup> Subspecies *piersmai* and *rogersi* are likely to occur.

<sup>53</sup> Formerly in the genus *Limicola*. Subspecies not determined, most likely ssp. *sibirica*.

<sup>54</sup> Most likely nominate ssp.

<sup>55</sup> Based on photographs.

<sup>56</sup> Cocos (Keeling) Is. ca. 10 birds observed in 2012.

<sup>57</sup> No positive observations accepted for Cocos (Keeling) Is.

<sup>58</sup> Often subsumed within *Tringa*. *Tringa terek* is a synonym. Non-breeding migrant.

<sup>59</sup> Sometimes placed in the genus *Actitis*.

<sup>60</sup> <i>Tringa totanus</i> (Linnaeus, 1758).....	Common Redshank	V	Vr
<i>Tringa stagnatilis</i> (Bechstein, 1803).....	Marsh Sandpiper	V	V

<sup>77</sup> <i>Chlidonias leucopterus</i> (Temminck, 1815) ...	White-winged Black Tern (White-winged Tern)	V	V

<sup>60</sup> Subspecies not determined.

<sup>61</sup> On Cocos (Keeling) Is. some birds remain throughout the year.

<sup>62</sup> Subspecies not determined.

<sup>63</sup> Subspecies not determined, most likely *kamtschatschensis*.

<sup>64</sup> Often merged in the genus *Sterna*.

<sup>65</sup> Some observations may be attributed to *G. n. nilotica*.

<sup>66</sup> Identified from photographs.

<sup>67</sup> Sometimes placed in the genus *Sterna*.

<sup>68</sup> Single specimen from Christmas I. identified as ssp. *christatus*. Other observations concern immature birds not attributable to subspecies.

<sup>69</sup> Subspecies not determined, most likely ssp. *bengalensis*. Often subsumed within the genus *Sterna*.

<sup>70</sup> Previously placed in the genus *Sterna*.

<sup>71</sup> Previously placed in the genus *Sterna*.

<sup>72</sup> Previously placed in the genus *Sterna*.

<sup>73</sup> Previously placed in the genus *Sterna*.

<sup>74</sup> *O. f. serratus* synonymised with ssp. *nubilosus*.

<sup>75</sup> Subspecies not determined.

<sup>76</sup> Subspecies not determined. Sometimes placed in the genus *Sterna*.

<sup>77</sup> Sometimes placed in the genus *Sterna*.

<sup>78</sup> Subspecies not determined. South Polar Skua *S. maccormicki* could also occur.

<sup>79</sup> Most likely ssp. *indicus* judging from photographs.

<sup>80</sup> Treated as monotypic with no subspecies recognised.

<sup>81</sup> Christmas Island *P. l. fulvus* (an endemic ssp.) recently re-invaded by nominate *P. l. lepturus* birds. Christmas Island now comprises *P. l. fulvus*, *P. l. lepturus* and hybrid populations.

<sup>82</sup> Common resident on Christmas I. interbreeding with *P. l. fulvus* - see above footnote.

<sup>83</sup> Common resident on Christmas I. interbreeding with *P. l. lepturus* - see above footnote.

<sup>84</sup> No specimens available, but ssp. probably *dulciae*. Sometimes placed in the genus *Oceanites*.

<sup>85</sup> Sometimes treated as a subspecies *T. chlororhynchos*, but genetic distance and differences in morphology between Atlantic and Indian Yellow-nosed Albatross are slight.

<sup>86</sup> Mostly listed as *O. matsudairae*, but Nagamichi Kuroda latinised Y. Matsudaira's Japanese name as *matsudariae* and this has not been validly emended.

<sup>87</sup> One confirmed record.

<sup>88</sup> Sometimes placed in the genus *Puffinus*.

<sup>89</sup> North Keeling I. 2009. Recorded on ground at night; ssp. unknown. Christmas Island October 2019.

**Order SULIFORMES**

**Family FREGATIDAE** Frigatebirds

<sup>139</sup> <i>Cyanoptila cyanomelana</i> (Temminck, 1829) .....	Blue and White Flycatcher	V	V
<sup>140</sup> <i>Ficedula narcissina</i> (Temminck, 1836).....	Narcissus Flycatcher	Ø	V
<i>Ficedula mugimaki</i> (Temminck, 1836) .....	Mugimaki Flycatcher	Ø	V
<sup>141</sup> <i>Monticola solitarius</i> (Linnaeus, 1758).....	Blue Rock Thrush	Ø	V
<sup>142</sup> <i>Oenanthe oenanthe</i> (Linnaeus, 1758) .....	Northern Wheatear	V	Ø

**Family PASSERIDAE** True (Old World) sparrows

<sup>143</sup> <i>Passer montanus</i> (Linnaeus, 1758).....	Eurasian Tree Sparrow	Rc	Ø
---	-----------------------	----	---

**Family PLOCEIDAE** Weavers, widowbirds

<sup>144</sup> <i>Ploceus hypoxanthus</i> (Sparrman, 1788) .....	Asian Golden Weaver	Ø	X
--	---------------------	---	---

**Family ESTRILDIDAE** Estrildid finches

<sup>145</sup> <i>Stizoptera bichenovii</i> (Vigors & Horsfield, 1827).....	Double-barred Finch	Ø	X
<sup>146</sup> <i>Padda oryzivora</i> (Linnaeus, 1758) .....	Java Sparrow	Ru	X

**Family MOTACILLIDAE** Wagtails and pipits

<sup>147</sup> <i>Dendronanthus indicus</i> (Gmelin, JF, 1789).....	Forest Wagtail	V	Ø
<sup>148</sup> <i>Motacilla tschutschensis</i> Gmelin, JF, 1789 .....	Eastern Yellow Wagtail		
<sup>149</sup> <i>Motacilla tschutschensis simillima</i> Hartert, 1905 .....		V	V
<i>Motacilla tschutschensis macronyx</i> (Stresemann, 1920) .....	Mongolian Yellow Wagtail	V	V
<sup>150</sup> <i>Motacilla tschutschensis taivana</i> (Swinhoe, 1863) .....	Green-headed Yellow Wagtail	V	V
<sup>151</sup> <i>Motacilla citreola</i> Pallas, 1776.....	Citrine Wagtail	V	Ø
<i>Motacilla cinerea</i> Tunstall, 1771 .....	Grey Wagtail		
<i>Motacilla cinerea cinerea</i> Tunstall, 1771 .....		Vr	V
<i>Motacilla alba</i> Linnaeus, 1758 .....	White Wagtail		
<i>Motacilla alba ocularis</i> Swinhoe, 1860.....		V	V
<i>Motacilla alba leucopsis</i> Gould, 1838 .....		V	Ø
<sup>152</sup> <i>Anthus godlewskii</i> (Taczanowski, 1876).....	Blyth's Pipit	V	Ø
<sup>153</sup> <i>Anthus trivialis</i> (Linnaeus, 1758).....	Tree Pipit	Ø	V
<i>Anthus cervinus</i> (Pallas, 1811) .....	Red-throated Pipit	V	V

**Family EMBERIZIDAE** Buntings

<sup>154</sup> <i>Emberiza aureola</i> Pallas, 1773 .....	Yellow-breasted Bunting	Ø	V
---	-------------------------	---	---

<sup>137</sup> Subspecies unknown, most likely the nominate.

<sup>138</sup> Subspecies unknown, most likely the nominate.

<sup>139</sup> Subspecies not determined, most likely *cyanomelana* or *intermedia*.

<sup>140</sup> Subspecies not determined.

<sup>141</sup> Subspecies not determined.

<sup>142</sup> Identified from photographs (K. Coate 1996) contra BARC ruling 214. Possible Isabelline Wheatear *O. isabellina* could occur judging from tail pattern of one observation 1998 (Johnstone & Storr 2004).

<sup>143</sup> Subspecies not determined, most likely *malaccensis*.

<sup>144</sup> Introduced to Cocos (Keeling) Islands; failed introduction.

<sup>145</sup> Formerly in the genus *Taeniopygia*. Possible aviary escapee - recorded 1982 and 1989. No subsequent records.

<sup>146</sup> Formerly in the genus *Lonchura*. Introduced to Cocos (Keeling) Islands before 1828; now extirpated.

<sup>147</sup> Formerly *Motacilla dendronanthus indicus*.

<sup>148</sup> Sometimes the Eastern and Western Yellow Wagtails treated as a single species *M. flava*.

<sup>149</sup> *M. t. simillima* herein considered distinct from *M. t. tschutschensis*.

<sup>150</sup> Sometimes treated as a full species.

<sup>151</sup> Subspecies unknown, most likely the nominate.

<sup>152</sup> One specimen collected 1923. A few other observations may be attributed to this or other *Anthus* spp.

<sup>153</sup> Most likely nominate ssp.

<sup>154</sup> Identified from photographs - December 2020.
